

# INDONESIA

## STATE OF WATER, SANITATION AND HYGIENE

For a population of 273,500,000 people (2020)<sup>i</sup>

Based on available trends:

To ensure 100% safely managed water by 2030, there is an urgent need to frequently measure progress towards SDG 6.1.

To ensure 100% safely managed sanitation by 2030, there is an urgent need to frequently measure progress towards SDG 6.2.

To ensure 100% handwashing facilities with soap by 2030, address remaining inequalities facing those hardest to reach (6% nationally).

1 in 42 children die under the age of five (2.4% child mortality) each year<sup>ii</sup>

Indonesia ranks 109 on the Human Development Index.<sup>iv</sup>

19420 people die due to lack of access to WASH each year<sup>iii</sup>

For wealth equality, the GINI coefficient is 38.2. In terms of gender equality<sup>v</sup> Indonesia, ranks 19 in the region and 121 in the world<sup>vi</sup>

## CLIMATE AND SDG 6<sup>x,x<sub>i</sub>,x<sub>ii</sub>,x<sub>iii</sub></sup>

90% of the problems caused by climate change are weather related, which have significant connections to the water cycle and overall availability of water.<sup>xiv</sup> Since 2000, there have been 235 climate, hydrological and meterological disasters with an average of 9,384,603 people affected and 6,170

## SWA RESULTS FRAMEWORK

**Objective 1: BUILD AND SUSTAIN THE POLITICAL WILL TO ELIMINATE INEQUALITIES IN WATER, SANITATION AND HYGIENE**

**Vulnerable groups:** there are government reported measures targeting vulnerable groups for water, sanitation, and hygiene. <sup>xv</sup>

deaths in the country attributed to these. Indonesia is ranked 103 out of 182 countries in regards to its vulnerability and readiness to successfully adapt to climate change. Indonesia is ranked 81 on the planetary pressures-adjusted HDI (PHDI).

- High level political dialogue leading to commitment and action\*
- Connecting with other SDGs for WASH prioritization\*

Vulnerable groups targeted are: People living with disabilities, Populations with a high burden of disease, Indigenous populations, Poor populations, Internally displaced persons and/or refugees, Populations living in remote or hard-to-reach areas, Populations living in slums or informal settlements, Women

**Objective 2: CHAMPION MULTI-STAKEHOLDER APPROACHES TOWARDS ACHIEVING UNIVERSAL ACCESS TO SERVICES**

- Government-led multi-stakeholder platforms\*
- Mutual Accountability through the SWA Mutual Accountability Mechanism\*

**Achievements:** 0% of the commitments have been achieved. More information can be found on the country page.<sup>xvi</sup>

**Government-led National Reviews:** National multi-stakeholder review mechanism exists for: drinking water, sanitation, hygiene. Points to improve: actions based on mutual review and agreed framework, evidenced-based decision making.<sup>xvii</sup>

### COMMITMENTS

**Objective 3: RALLY STAKEHOLDERS TO STRENGTHEN SYSTEM PERFORMANCE AND ATTRACT NEW INVESTMENTS**

**The WASH Budget per capita:** <sup>xviii</sup> 2.64 USD (2018) Regional average: 4.46 USD (2018) Regional rank: 6 (2018)

**WASH Budget as % GDP:** <sup>xix</sup> The WASH budget is 0.07% of the GDP (2018) Regional average: 0.13% (2018) More can be found in the Collaborative Behaviour Country Profile. <sup>xvi</sup>

**Economic return:** Every dollar invested in the rural poorest quintile has an economic return of 17.8 dollars in South-eastern Asia.

- Multi-year and costed finance strategy\*
- Resources and policies to reduce inequalities in WASH access\*

### Absorption of funds committed

	urban sanitation	rural sanitation	urban drinking water	rural drinking water
Domestic	●	●	●	●
Donor	●	●	●	●
<div> <div></div> Less than 50%                     <div></div> Between 50% and 75%                     <div></div> Over 75%                 </div>				

Country situation as evaluated by national stakeholders – from unsatisfactory to very satisfactory on a 5 point scale: ●●●●●. Missing data: ●
